

Kahoot is a game-based learning platform that can be used both in the classroom or asynchronous. This platform makes it easy to create learning quizzes. Their private policy explains how they use and process all personal information. Kahoot acts as a data processor for personal information in user content. Such personal information includes, name, e-mail address, telephone number and job title. A username and password are also collected. Other data that they collect is (MAC) address, computer type, usage data, log data, cookies and pixel tags. They may use your personal information to help provide you with services such as informing you when a Kahoot! Game is shared. Depending on the package, Kahoot will also ask for payment information. Your personal information may be used to collect money.

Khan Academy is a free nonprofit organization that provides online learning website that offer several different courses. They will collect information either from you directly or from others, such as your parent teacher or third party. They also may collect information automatically, such as cookies or web beacons. Some information collected include, username, birthdate, email, information from your browser such as general location and information you choose to include in your profile. They may share your information with other users of their service, or with your consent to third parties. You are able to choose whether you want your information shared or not.
